

Michael Yeh Software Engineer

immichaelyeh@gmail.com | San Diego, California

PROFESSIONAL EXPERIENCE

Optum (UnitedHealth Group), Software Engineer 2022 – Present | Remote, USA

- Reduced AWS Cloud costs by \$200K+ annually by eliminating redundant API calls and implementing caching across backend services.
- Delivered mobile notifications to 1M+ members by designing a high-throughput multi-threaded messaging system.
- Delivered an automated onboarding system capable of processing 10M+ new clients before peak enrollment season by building a high-throughput event-driven eligibility platform integrating legacy healthcare services.
- Saved 40+ engineering hours weekly by building an internal support tool that allows operations teams to create test users, diagnose, and resolve issues without engineering intervention.
- Remediated healthcare regulatory compliance risks by identifying critical security vulnerabilities and leading remediation across multiple backend services.

Cubic Corporation, Software Engineering Intern 2021 | San Diego, CA (Remote)

- Reduced manual testing effort by 100+ hours per month by designing and implementing a REST API testing harness with simulated data in Postgres.
- Resolved 500+ defects across application code and automated test suites, improving build stability and test reliability.
- Presented internship onboarding improvement recommendations to senior leadership, influencing future improvements to the program.

SKILLS

Languages: Java, Python, Go, Rust

Cloud / Infrastructure: AWS (Lambda, API Gateway, S3, SQS, Step Functions, CDK, Glue)

Databases: DynamoDB, Postgres, Redshift

Tools: Datadog, Git, GitHub, GitHub Actions, LaunchDarkly

EDUCATION

B.S. Mathematics-Computer Science, University of California - San Diego
